

ANUSHA SUNDARAMURTHI

☎ +91 8870482926 ✉ anushasundaramurthi@gmail.com 🔗 LinkedIn 🌐 GitHub 📍 Puducherry, India

Summary

AI & Automation Engineer with hands-on experience designing and deploying agency-wide workflow automation systems (n8n, REST APIs, webhooks) alongside production-grade AI/LLM applications (RAG pipelines, FastAPI backend systems, LangChain). Built and shipped 15 automation workflows integrating Microsoft Graph, Notion, and social platforms; improved model precision by 20%, cut API latency by 35%, and reduced LLM inference cost by 100%. Skilled in Python, backend/microservices development, NLP, Generative AI, and cloud deployment on AWS.

Experience

White Digital Canvas (WDC) / White Creative Network

Apr 2026 – Present

Associate Automation Specialist

Puducherry, India

- Developed and deployed 13 end-to-end business automation workflows using n8n, Microsoft Graph API, Notion, and Outlook, automating 5+ manual business processes and cutting repetitive operational effort by an estimated 40–60%.
- Eliminated approximately 2–4 hours of manual work per day through automated reporting, email summaries, and workflow routing; reduced manual brief assignment time from 10–15 minutes to under 1 minute via intelligent auto-routing.
- Built automated client data synchronization across multiple client accounts, reducing manual data entry by 90%; designed daily reporting workflows generating 3 scheduled reports (Morning Brief, Midday Check, EOD) without manual intervention.
- Integrated 6+ business platforms — Outlook, OneDrive, Teams, Notion, Claude AI, and Google Alerts RSS — into unified automation pipelines; resolved 20+ API integration and authentication issues across Microsoft Graph, Teams, and Notion.
- Report directly to the Managing Director as sole owner of the automation function; collaborate with Operations, Account Management, Design, and Content teams to automate internal business processes.

IG Enterprises

Jun 2025 – May 2026

AI Engineer Intern

Puducherry, India

- Achieved a 20% precision gain via BERT-based semantic embeddings and spaCy NER pipelines for multilingual intent classification.
- Led FastAPI deployment of a production conversational AI backend system, reducing API latency by 35%; integrated Whisper STT for 3 live voice workflows.
- Optimized LLM inference via quantization and batching, cutting p95 response time by 40% and improving semantic search relevance by 28% in A/B tests.
- Collaborated in Agile cross-functional teams on model evaluation using Precision/Recall, F1-Score, and A/B testing; maintained technical documentation via Git.

Key AI Projects

Nuvex: Multi-Agent AI Shopping Assistant | *LangGraph, GPT-4.1, Qdrant, FastAPI, PostgreSQL, Docker*

Jun 2026

- Engineered a coordinator-specialist multi-agent shopping assistant with LangGraph and GPT-4.1 across 4 specialist agents; integrated Qdrant hybrid search (dense + BM25) with Cohere reranking, RAGAS evaluation, and a PostgreSQL-backed cart/inventory system across 6 Docker microservices.

RAG Customer Support Chatbot | *LangChain, LlamaIndex, FAISS, Ollama, AWS*

Mar 2026

- Architected an end-to-end RAG pipeline (LangChain, LlamaIndex, FAISS Top-K=8) on AWS; cut hallucinations across 500+ queries via prompt engineering and reduced cloud API cost by 100% using offline Gemma3:1b via Ollama.

ResuMate: AI Resume Analyser | *NLP, Embeddings, Claude API, FastAPI*

Sep 2025

- Built an NLP-powered ATS engine with semantic similarity and the Claude API, exposed via a REST API; generated real-time reports for 1,000+ resumes with 95%+ extraction accuracy.

Technical Skills

Programming & Backend: Python (Advanced), REST APIs, FastAPI, Flask, Microservices, C, C++

AI/ML & LLMs: PyTorch, TensorFlow, Hugging Face, LangChain, LlamaIndex, Ollama, spaCy, Scikit-learn

Generative AI & NLP: RAG Pipelines, Prompt Engineering, LLMs, Diffusion Models (LDM, U-Net, DiT), Text Classification, NER, Embeddings, Semantic Similarity

Workflow Automation: n8n, Webhooks, API Integrations, Model Evaluation (F1, FID, CLIP)

Cloud & Databases: AWS, Docker, MySQL, MongoDB, PostgreSQL, FAISS, Vector DBs (ChromaDB)

Tools: Git, GitHub, CI/CD, React

Web & SEO: WordPress, SEO Fundamentals (learning)

Education

Women's Engineering College

Dec 2022 – May 2026

B.Tech in Computer Science & Engineering

Puducherry, India

- CGPA: 6.63 overall (7.8+ in AI/ML & CS core) — Coursework: Machine Learning, AI, DSA, OS, DBMS, Computer Networks

Certifications & Leadership

- Cloud Computing Fundamentals (Feb 2026) · Fundamentals of Agents – Hugging Face (Oct 2025) · SWAYAM-NPTEL Psychology
- President, Cyber Security & Ethical Hacking Club — led a 50+ member community, ran digital security workshops
- Social Media Manager — grew engagement by 30% · Best Student Volunteer Award — Har Ghar Tiranga (100+ participants)
